Explanation of Column Headings

TSN is the acronym for Taxonomic Serial Number, an organism's unique identification number from the Integrated Taxonomic Information System (ITIS). Standard taxonomic information is available for positive TSN values from the ITIS web site (<http://www.itis.gov>). Negative TSN values represent records in NPSpecies that are pending reconciliation with ITIS.

Taxonomic names in columns **Standard Scientific Name** and **Standard Common Name(s)** are from the Integrated Taxonomic Information System.

Some records may include names used locally in columns **Preferred Scientific Name** and **Preferred Common Name(s)**.
